

# Conference Macrophages in vertebrates Towards clinical applications

15 January 2016  
Université de Montpellier,  
Campus Triolet - Amphi 23.01  
Montpellier, France

**09:30 Opening & Coffee**

## Session 1

**Chairman: Dr Jean-Marc Lemaître**

10:30- **Michael SIEWEKE**: Therapeutic interest of targeting macrophage self-renewal and origin (CIML, INSERM 1104, Marseille, France).

11:00- **Gerhard KRONKE**: A differential role of macrophages during the clearance of self and non-self (University of Erlangen, Erlangen, Germany).

11:30- **Toby LAWRENCE**: Targeting tumour-associated macrophages in cancer (CIML, INSERM 1104, Marseille, France).

**Lunch Break**

## Session 2

**Chairman: Dr Naomi Taylor**

14:30- **Julien BERTRAND**: Characterization of the mononuclear phagocytic system in healthy and sick adult zebrafish (Université de Genève, Genève, Suisse).

15:00- **Maximina YUN**: Programmed cellular senescence during vertebrate regeneration (University College London, London, UK).

15:30- **Bénédicte CHAZAUD**: Macrophage phenotypes and functions in acute and chronic inflammation - example of skeletal muscle (Université Claude Bernard Lyon 1, Villeurbanne, France).

16:00- **Florence APPARAILLY**: Control of monocyte diversity and plasticity for clinical applications (IRMB, Inserm U1183, Montpellier, France).

## Organisers

Farida DJOUAD  
IRMB, Inserm U1183,  
Montpellier, France
